

BRAZIL MINERALS, INC. ADVANCES ITS LITHIUM PROJECT

PASADENA, CA--(May 9, 2018) - [Brazil Minerals, Inc.](#) (OTC: [BMIX](#)) (the "Company" or "Brazil Minerals") announced today that it has been advancing the pre-drilling phase on its 288-acre lithium project located in the region of Salinas, state of Minas Gerais, in Brazil. This mineral right is inserted within the district chosen by CPRM (“Companhia de Pesquisa de Recursos Minerais”), the Brazilian geological survey, as the most prospective ground for lithium in Brazil. Recently, the Company retained two consulting geologists for development and intends to field an *in-loco* campaign in the second semester of 2018. Separately, Brazil Minerals has already been approached, on an unsolicited basis, by interested parties.

The indications are that the claim’s terrain is granitic and composed of LCT (lithium, cesium, tantalum) pegmatites. A nearby property has seen exploration of a pegmatite with lepidolite and amblygonite, two lithium bearing minerals. In this district, the identified lithium deposits are associated with pegmatite formations, as seen in the photographs attached.

Brazil's lithium reserves are expected to grow to 8% of the world's total. Today, Argentina, Chile and Bolivia, together, respond for 70% of the world's known lithium reserves. Demand for lithium is outstripping production and is primarily driven by growth in electric vehicles and smart phones.

Brazil Minerals has built a portfolio of high quality mineral rights (the "BMIX Mineral Bank") and continues to add areas methodically. The Company regularly evaluates and prioritizes its research effort on such properties and utilizes its own team and equipment for drilling.

BMIX Mineral Bank:

Gold: 119,989 acres

Diamond (kimberlites): 92,961 acres

Diamond (alluvial): 27,612 acres

Cobalt/Copper/Nickel: 5,011 acres

Iron/Titanium/Vanadium: 4,938 acres

Lithium: 288 acres

Manganese: 4,970 acres

Aquamarine/Beryl/Tourmaline: 288 acres

Sand (construction industry): 4,995 acres

About Brazil Minerals, Inc.

Brazil Minerals, Inc., along with its subsidiaries, has a business model focused on: 1) mining specific areas for gold and diamonds, and 2) generating projects from its portfolio of high quality mineral rights for transactions leading to royalties and/or equity positions. Our first equity holdings from such strategy is a 55.4% ownership in [Jupiter Gold Corporation](#). More information on Brazil Minerals is at www.brazil-minerals.com.
